

# ICE 2009-07-03

## Summary

This week we cleaned out a few old tickets; some we closed, others we revived and some we'd even completed without knowing it.

Ron added some finishing touches to the book editor and fixed some bugs. He started work on exporting CML content via AtomPub. Since then, this has expanded in potential and he will continue next week on a broader WordPress plugin that will be able to cater for ICE export items like slides and the jmol plugin based cml images.

Cynthia worked on solving the annoying toolbar shortcut key crashes OOo problem and nailed it. Ubuntu users can now use ALL functions on the toolbar and the hidden Autotext in Word 2007 for USQ courseware users has now been re-arranged.

Linda did help out with some book template issues that interfered with the TOC display for USQ courseware books.

**Predicted work units: 30**

## Overview of completed tasks

### Components

#### Administration

- Testing
- Publications repository for USQ

#### Application

- Book editor tidying
- Ajax callbacks
- Bug fixing

#### Templates

- Ubuntu toolbar functions
- Bug fixing
- USQ autotext list rearrangement

## Outstanding tasks

- AtomPub WordPress plugin for ICE content
- Finish book editor

## Overview of new tasks

### Components

#### Administration

- Documentation of ICE
- Testing
- PhD Thesis

#### Application

- Bug fixing

#### Templates

- Tidying mpr email interface
- List testing
- Updating toolbar repair functions

## About the cycle notes

The cycle notes are used to summarize the outcomes of the completed cycle and provide stake-holders with an overview of the tasks for the next cycle. They are also used to raise any issues for discussion and provide other information for those who are unable to attend the meetings. Specific information on tasks to be completed are available in the ticketing system, see below.
