

Integrated Content Environment

What is ICE?

The Integrated Content Environment (ICE) is a free Word-processor based system that allows authors to work individually or collaboratively on material for the Web, CD and print

Blog documents complete with images straight from your word processor

Integrated Content Environment

ICE lets you create web and print documents (slideshows and audio) from a word processor. You can use Microsoft Word, or the free OpenOffice.org. ICE can be installed on Windows, Mac or Ubuntu.

-
- Download templates and add ins.
 - Use our [online conversion service](#)².
 - Contact us to obtain a trial account on an ICE server.
 - Use ICE stand-alone to make [HTML](#)³ or to blog.
 - Create your own web sites or courseware using ICE.
 - Use ICE in full collaborative mode. You will need to set up a server for group collaboration; we have this in place at USQ.
 - Enrich research data - [View Chemistry Demo](#)
