

Blog from OpenOffice.org

This document outlines how to setup ICE and the OpenOffice.org toolbar for conversion of documents to XHTML via ICE and publish directly to Wordpress from OpenOffice.org.

Note:

This feature is not currently available for MacOSX.

How do I start?

1. Download and install [OpenOffice.org](#)
2. [Download ICE toolbar](#) for OpenOffice.org (development version)
3. Install the toolbar using these [instructions](#).
4. Download and install ICE

How do I publish?

1. Start ICE
2. Open a Writer document in OpenOffice.org
3. Style the document using the ICE toolbar
4. **Save** document
5. From the Advanced ICE Toolbar, select **Atom Pub**.

6. Enter detail, for example:

ICE Publish

Options:

Title:

Author:

Summary:
