

# Blog from OpenOffice.org

This document outlines how to setup ICE and the OpenOffice.org toolbar for conversion of documents to XHTML via ICE and publish directly to either Wordpress or Blogger from Word.

## Note:

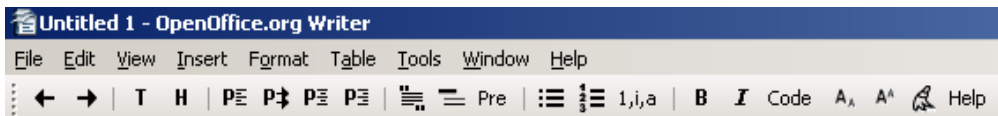

This feature is not currently available for MacOSX.

## How do I start?

1. Download and install [OpenOffice.org](#)
2. [Download ICE toolbar](#) for OpenOffice.org (development version)
3. Install the toolbar using these [instructions](#).
4. Download and install ICE

## How do I publish?

1. Start ICE
2. Open a Writer document in OpenOffice.org
3. Style the document using the ICE toolbar

4. **Save** document
5. From the Advanced ICE Toolbar, select **Blog**.

6. Enter detail, for example:

ICE Publish To Blog

Options:

Title: Document Title

Author: MyName

Summary: An ICE document for publishing to my blog

URL: http://username.wordpress.com/wp-app.php
